- Termination of different cabling at control panels and distribution boards
- Servicing and maintenance of electrical systems
- Carry out final testing of control systems
- Carry out electrician duties as required on EnerQuip sites
- Occasional travel to site
- Ensure that the Quality, Health and Safety and Environmental Management Systems are followed and any problems, perceived or real, are reported
- Carry out any other duties as required by management

3. KNOWLEDGE, SKILLS, EXPERIENCE & REQUIREMENTS

- Must have served a recognised electrical apprenticeship
- Proven knowledge and experience in electrical fixed wire testing, installing and maintaining up to 415V
- 18th Edition and Inspection and Testing is not essential but preferable
- Good problem-solving skills
- Self-motivation and ability to meet deadlines
- Positive personality with a ‘can-do’ attitude
- knowledge of relevant legislation and guidelines
- Driving Licence
- Ability to work in a safe and effective environment with minimum supervision

4. KEY MEASURES

- Competency
- QHSE performance
- On-time delivery
- Quality of product.
- Quality of Service
